Cameron Cashwell

Front-End Web Developer, Web Engineer **/**
cashwellcamc@gmail.com /

EXPERIENCE SUMMARY /

My background consists of 6.5 years experience in Web; with primary duties of acting as a Front-End Web Developer, but also a Full-Stack Developer, Web Designer, and Entrepreneur. I created two freelance sole proprietors in the past, 'Dark Green LLC' and 'Dcoi Designs' both with slightly different Web and Development niche services. I have also done a lot of contract work, varying 6 month to a year, and primarily on-site; I enjoyed this work setup as I got to see a variety of different types of projects and industry mediums. I'm full stack capable, but lean toward the front-end, passion wise.

EXPERIENCE /

Carney, Inc, Washington D.C. Metro — *Software Engineer (Contract)*

PROFESSIONAL OBJECTIVE /

Creative and curious Front-End Web Developer; with a passion for usability, ideas, and clever progressive technology. I'm constantly learning, and improving. I will begin a M.I.S. program starting late fall of 2018 in 'Information Systems Technology (Web Development)' to push and solidify my skills and knowledge further. To stay up with trends I enjoy industry blogs and neat resources such as 'FreeCodeCamp'. Outside of Software Development I hold additional interests in Business and Design. I look forward to working with a creative and open team on exciting and interesting interactive projects!
